

REMARKS

The claims have been amended to place them in the same form as in the parent application. The specification fully supports the foregoing new claims 51-59, which do not add any new matter to the present continuation of the parent application noted above. The Applicants also believe the pending claims to be patentably distinct from the prior art and in condition for allowance. The Applicants further note that evidence of non-obviousness, such as commercial success, will be submitted shortly after filing this continuation application.

Conclusion

If the Examiner believes certain amendments are necessary to clarify the present claims or if the Examiner wishes to resolve any other issues by way of a telephone conference, the Examiner is kindly invited to contact the undersigned attorney at the telephone number indicated below.
